January 13, 2020

Dear Parent of a Northern Junior:

The staff at Northern High School is getting ready to begin a very important part of the scheduling process for the 2020-21 school year. I would like to inform you of the timelines the Northern staff will be using in the scheduling process. On Monday, January 27, 2020, Northern will be hosting its annual Curriculum Fair from 7:15 A.M. until 9:40 A.M. During the Curriculum Fair students will have the opportunity to hear information and ask questions about four different classes in which they are interested. Each of the four presentations will be twenty minutes in length. The students are to attend one presentation during each of the four sessions. Information about the Curriculum Fair will be sent out in an additional e-mail.

On Monday, January 27, 2020, students will receive their registration materials from their English teacher. From Monday, January 27, 2020, through Wednesday, January 29, 2020, the teachers will be answering students’ questions about enrollment possibilities for the next school year. Please encourage your student to ask as many questions as possible. Teachers will also be making verbal course recommendations to your student. Some classes will require teacher approval in order to enroll in that particular class. The teacher’s signature on the registration form will indicate to the counselor that the student has been approved to enroll.

The students will register online for their classes using the Family Access computer program. Complete step-by-step instructions for registering for classes will be located on Northern’s homepage starting Monday, January 27, 2020. The Northern homepage is located at: http://www.wlcsd.org/Northern.cfm. Please look on the left side of the web-page for the icon, “Registration Instructions”. Also located on the Northern homepage is the Walled Lake Program of Study book—which is a complete listing and description of the all courses that the three Walled Lake High Schools offer. The window of opportunity to enter the course requests is from Monday, January 27, 2020, until Friday, February 7, 2020. Your student’s counselor will speak individually with your student between Monday, February 24, and Friday, April 3, 2020.

A review of the core curriculum for the 12th grade is included to help you in your discussions with your student about what classes would be best for him/her next school year. If your student is interested in taking advantage of the programs available at the Oakland Technical Center, now is the time to select this option as most programs have limited space available.

Most importantly, the senior year is a time for enrichment and the opportunity to earn college credit through advanced placement courses, dual enrollment in high school and college, or the opportunities for credit recovery through Michigan Virtual High School. Please see the enclosed advanced placement information sheet. The senior year is not the time to find the least challenging courses available to slide through with the least amount of work. It is the time to focus on college preparation and valuable experience gained through School-To-Work (co-op programs).

Northern offers the following full-year Senior English courses: AP English Language and Composition, AP English Literature and Composition, AP Seminar, AP Research, and English 12A/B. All AP English and AP Seminar courses require a teacher recommendation and the successful completion of the prerequisites in order to gain admittance into the course. The prerequisite for AP Seminar is the successful completion of AP English Language and Composition or Honors English 11, but the AP Lang. or AP Lit. Route is preferred if neither of those courses have yet to be taken. The College Board stipulates that the successful completion of AP Seminar is an absolute prerequisite for AP Research, and no waivers will be granted for AP Research and the AP Capstone program. In addition to the full-year courses, a
variety of semester courses also are available that would satisfy the Senior English requirement: Communications, Contemporary Novels: Women’s Literature, Creative Writing, Literature on Film, Media Literacy, and Mythology. While a senior needs to receive a full credit of English, he/she could take two semester courses that would satisfy the graduation requirement. A student who is enrolled in a full-year English course may take one of the grade appropriate semester courses as an elective.

In Mathematics, Northern offers Advanced Placement Calculus AB, Advanced Placement Statistics, Pre-Calculus A/B, Algebra 2, Probability and Statistics and Applications of Advanced Mathematics as yearlong classes. Students planning on attending college should complete at least four years of Mathematics. The following will help you determine which math course will be the correct course for your student:

- If your student is currently enrolled in Algebra 1, your student should take Geometry.
- If your student is currently enrolled in Geometry, your student should take Algebra 2, or Algebra 2 Extended.
- If your student is currently enrolled in Algebra 2, your student should take Pre-Calculus, Applications of Advanced Mathematics, or Statistics A/B.
- If your student is currently enrolled in Algebra 2 Calculus Path, your student should take Pre-Calculus, Honors Pre-Calculus, or Applications of Advanced Mathematics.
- If your student is currently enrolled in Pre-Calculus, your student should take AP Calculus AB or AP Statistics.
- If your student is currently enrolled in Honors Pre-Calculus, your student should take AP Calculus AB or AP Statistics.

Math teachers will be making recommendations and discussing with each student what course should be taken.

In Science, Northern offers General Biology, Honors Biology, Advanced Placement Biology, Advanced Placement Environmental Science, General Chemistry, Honors Chemistry, Advanced Placement Chemistry, Physics, Advanced Placement Physics, Earth Science, and Advanced Placement Environmental Science. Northern offers one semester courses in Forensics 1 & 2, Anatomy, Astronomy and Oceanography. Students expecting to attend college should complete at least four years of science.

Northern also offers a wide range of elective classes in the following areas: Language Arts, Science, Mathematics, Social Studies, Visual and Performing Arts, Career Technical Education, and Health / Physical Education. Please refer to the registration materials distributed to the students at the Curriculum Fair. If you would like to see a copy of the Program of Studies Book, log on to the Northern Home page on the Internet at www/wlcisd.org/Northern and click on the Program of Studies Book icon.

The following are additional scheduling options available to Walled Lake Students

FLEX SCHEDULES:
Students have the option of a flex schedule in which allows them to take two classes on-line using E2020. Students may select a FLEX AM schedule which is the first two hours of the day or a FLEX PM schedule which is the last two hours of the day. A teacher is available for additional support everyday in a drop in computer lab. For more information about E2020 curriculum visit http://www.education2020.com/

Online courses are also available as part of students' regular schedule. Students are required to work online in school as well as independently on their own time. Personal computer equipment must meet the needs of the course as specified in the online course description.

Students who wish to take advantage of a flex schedule must submit an application during the registration process. All students must provide their own transportation if they are leaving school for any reason.

Flex Schedule allows students to take up to two courses online replacing traditional courses at the high school.
• Course work must be done away from school and students must leave campus during this time.
• Courses must be completed during the regular semester timelines.
• A teacher is available 5 days a week for additional support in a drop in computer lab
• Final exams will be completed at school if applicable.

7th Hour Courses:
Students may take additional classes or classes for credit recovery using E2020 our on-line curriculum. The cost of these additional courses is $100. For more information, please see your counselor. For students taking a 7th hour online course in addition to a full schedule of six classes, students will be required to do most of the online work at home. Students working outside the high school setting must be aware of the need to access equipment that meets the minimum requirements as specified in the online course description.

The guidelines for the 7th class are as follows:
• Student must have internet access at home
• A teacher is available 3 hours per week as a drop in computer lab
• Course work must be done away from school and students must leave campus during this time.
• Courses must be completed during the regular semester timelines.
• Final exams will be completed at school if applicable.

IB Program

The International Baccalaureate® (IB) Diploma Program is designed as an academically challenging and balanced program of education that prepares 11th and 12th grade students for success at university and life beyond. IB Diploma requirements broaden the educational experience and challenge students to apply their knowledge and understanding. The program has gained international recognition and respect from the world's leading universities. For information about the IB Program please contact the IB staff at Walled Lake Western High school at 248-956-4400.

On April 14 – 15, 2020, all Juniors in the state of Michigan will be taking the Michigan Merit Test. The test is comprised of the following:

Day 1, April 14, 2020, “SAT Plus Writing” -- The SAT test consists of approximately 52 multiple choice Reading questions, 44 multiple choice Writing and Language questions, 58 multiple choice Mathematics questions, 1 essay question. The test will take three hours and fifty minutes to complete. Juniors will complete the test in the main gym.

Day 2, April 15, 2020, “WorkKeys” -- Testing will take place in the main gym. The test will consist of approximately 30 multiple choice questions related to Reading for Information, 30 multiple choice questions related to Applied Mathematics, and 15 questions related to Michigan Mathematics. It will take three hours to complete the test.

Day 3, April 21st or 22nd, M-STEP Social Studies and Science Test – This test will be completed with your Social Studies teacher.

The SAT portion of the MME will provide students with a reportable SAT score that can be used for college admission purposes. Students will NOT be assessed a fee for the test on Tuesday, April 14, 2020. Taking all three parts of the MME test is a graduation requirement for all Walled Lake students.

Sincerely,
Don Learmont
Assistant Principal

ADVANCED PLACEMENT PROGRAMS (AP)

The Walled Lake High Schools offer a number of advanced academic programs. The purpose of these course offerings is to provide challenging, thought-provoking, college level programs for students who are capable and desirous of exploring a subject area in greater depth and at an accelerated pace.

Students enrolled in these advanced academic programs also have the opportunity to prepare themselves to participate in the “Advanced Placement” (AP) program of the College Board. The AP program enables capable students to take an AP examination in May each year that may grant them “advanced placement” college credit. These exams are administered at the local high school, and the student pays the exam fee. This investment may yield college credit.

Descriptions of these advanced academic courses are included in this Program of Studies booklet under each department heading. Walled Lake offers AP courses in the following departments.

Art:
- Studio Art (AP)

English:
- English Language & Composition (AP)
- English Literature & Composition (AP)

Mathematics:
- Calculus (AP) (Calculus AB or Calculus BC)
- Statistics (AP)

World Language:
- Spanish (AP)
- French (AP)
- German (AP)

Science:
- Biology (AP)
- Chemistry (AP)
- Environmental Science (AP)
- Physics I & II (AP)

Social Studies:
- United States History (AP)
- Government (AP)
- Psychology (AP)
- World History (AP)
- Micro Economics (AP)

Career Technology:
- Computer Science Principals (AP)

Students planning to enroll in these advanced academic courses in the future should follow the recommended sequences of courses listed in the appropriate departmental course listings. Questions regarding the advanced academic program should be directed to the Counseling Department.

Grades for the above listed Advanced Placement courses are weighted as follows:
A=5.00  B=3.75  C=2.50  D=1.25  E=0.00

Therefore, a student’s grade point average and rank in class will be affected by taking Advanced Placement course.

2.0 World Language (Class of 2016 and Beyond), Teen Health, Personal Fitness and 1.0 Fine Arts, Performing Arts or Vocational Education can be taken any time during the four years of High School in the Elective Category

*Algebra 1, Geometry, and Algebra 2 must be completed
Dear Student:

Historically, school districts, in an effort to offer a broader, challenging, rigorous curriculum to meet students’ needs and interests, have allowed their students to attend courses at local colleges or universities, in addition to their regular high school curriculum. This is called “dual enrollment” or postsecondary enrollment.

Effective April 1, 1996, Public Act 160 created the Postsecondary Enrollment Options Act which directs school districts to assist students in paying tuition and fees for courses at Michigan public or private colleges or universities, a student is eligible if all of the following conditions are met:

1. Student is in grade 9, 10, 11 or 12.
2. Student has taken the Michigan Merit Exam (MME) and has achieved a qualifying score in all subject areas on the MME. The student who has NOT taken the MME must have achieved a qualifying score in all subject areas on the EXPLORE, PLAN, ACT or the College Board PSAT readiness assessment. If the student has not achieved a qualifying score in all subject areas on the MME, the ACT, EXPLORE, PLAN, or the College Board PSAT readiness assessment, or the SAT the pupil is eligible only for the limited purpose of enrolling in one (1) or more eligible courses in a subject area for which he or she has achieved a qualifying score, or in computer science or foreign language not offered by the school districts, or in fine arts as permitted by the district at a postsecondary institution.
3. Students must be enrolled in both the school district and postsecondary institution during the local school district’s regular academic year and must be enrolled in at least one high school class.
4. The district is not obligated to offer dual enrollment opportunities for courses that are currently part of their high school curriculum. An exception to this could occur if the Board of Education determines that a scheduling conflict exists, which is beyond the student’s control.
5. The college courses cannot be a hobby, craft, or recreational course, or in the subject areas of physical education, theology, divinity, or religious education.
6. School districts are required to pay the lesser of:
   a. the actual charge for tuition, mandatory course fees, materials fees and registration fees; or
   b. the statewide pupil-weighted average foundation allowance, adjusted to the proportion of the school year they attend the postsecondary institution.
7. School districts are not required to provide financial support for transportation or parking costs necessary for an eligible student to participate in postsecondary enrollment.
8. The postsecondary institution is only to enroll students with a letter from the district recognizing them as eligible for tuition payment by the district.
9. The students may not drop any course without the express written permission from the school district responsible for the payment of the tuition. The eligible student shall repay to the school district any funds that were expended by school district for the course that are not refunded to the school district by the eligible postsecondary institution. This does not apply to an eligible student who does not complete the course due to a family or medical emergency.

Please review the contents of this letter with your parent(s)/guardian(s). If you believe you are eligible for dual enrollment that you qualify for tuition and fee support, and you wish to participate, please contact your counselor.

Sincerely,

Don Learmont
Assistant Principal
